

Projectiondesign Demo Sale

Contact Distribution, the exclusive Canadian distributor of Projectiondesign products offers our gently used tradeshow & demo demo for sale at deeply discounted prices!

F1 SERIES

The F1 projector series has been designed to meet the stringent requirements of installers and professional users, and despite its small size, high performance and image quality have been main objectives during its development. With high brightness, lens options, flexible installation possibilities and highly accurate mechanics and optics, the F1 is fit for almost any installation need. The F1 has been designed with performance and value for money as the number one priority.

F3 SERIES

The projectiondesign F3 is the world's most powerful single chip DLP™ projector. It has been designed to meet the ever increasing requirements in professional imaging solutions, such as public displays, medical imaging, control rooms and visualization and simulation solutions. Utilizing DLP™ technology, the F3 SXGA+ features 1400 x 1050 pixel resolution, and fully configurable brightness at up to 5500 ANSI lumens, creating the world's most powerful single chip DLP™ projector. It is primarily targeted at rental and staging applications, as well as high intensity 24/7 installations.

\$ 6475.00

Standard Zoom Lens, VizSim colour wheel, 1400 X 1050 pixels, 2500:1 contrast, 4:3 aspect, 1600 Brightness, **DICOM compliant**, Bulb Hours: 27 1 Available

In medical applications, highly accurate image representation is a prerequisite. Projectiondesign medical projectors are designed to provide the most accurate imaging possible using Texas Instruments® DLP® technology. Thanks to pre-programmed DICOM simulation settings, DICOM compliant viewing is easy to access. Accuracy to the DICOM curve is guaranteed, as this optimization is done inside the projector's image processor. Users can choose from DICOM Clear Base, DICOM Blue Base, and DICOM Full White. These settings allow the user to work with the same settings on the projected image, as on monitors.

The Action! series is a dedicated range of home theatre projectors. The aim is to provide the best possible home theatre experience by providing image quality and integration possibilities in small and unobtrusive packages, easily fitting into most modern home theatres. With year long experience in designing projectors and display systems, the Action! mk II range is the culmination of projectiondesign technology, passion and enthusiasm. A team of dedicated enthusiasts bring out the Action! series.
